Vesna Tan

Brooklyn, NY, https://github.com/Tanvez

Cell: (347) 724-8761, email: tanvezi@gmail.com

Technologies

Proficient: JavaScript, HTML, CSS, Sequelize, Express, React, Node.js, Git, React-Redux, Mocha
Familiar: C++, Assembly, Ruby, Phaser.io, React-Native, Heroku, graphQL

Projects

MeJournal | **WIP** | **GITHUB**: https://github.com/BrooklynEightSix/Journal

A web application that tracks your expenses, water intake, and meal plans.

- Developed with React, React-Redux, graphQL, and mongoDB
- Designed graphQL schema and connected mongoDB backend
- Implementing expenses front-end view via React
- Working on connecting mongoDB server to graphQL

FrankenStyle | **GITHUB**: https://goo.gl/Z7ez3T **YOUTUBE:** https://goo.gl/eShL4m

A chrome extension that makes CSS easier and more fun! Style any webpages the way you want without the hassle of coding CSS.

- Developed with React, React-Redux, Chrome extension, and CSS
- Helped create mock-ups and wireframes
- Implemented iframe injection into the DOM of the current webpage so the sidebar can be rendered
- Designed and implemented key features such as flex-box, text-size, and color
- Created a key feature for downloading the modified CSS style sheet from the redux store

ArimosJS | **GITHUB**: https://github.com/VesJon/arimos.js **YOUTUBE:** https://goo.gl/6pdbTp
HEROKU: arimosjs.herokuapp.com
A retro dungeon crawler game where you must fight your way through bats and snakes.

- Developed with Phaser.io, Webpack, Browsersync, Express, and Sequelize
- Implemented enemy to player tracking which allowed the snake to track the players movements.
- Created game states, and tilemaps for the game levels and player sprites
- Helped implement Hi-Score list using Express/Sequelize backend

Experience

212 Tax & Accounting Services LLC – New York, NY
Junior Tax Accountant   May 2013 – April 2015

- Troubleshoot ProSeries software program to resolve problem areas; work with software vendor to determine the best resolution to particular issues.
- Performed research on complicated tax situations to recommend best approach for clients.
- Trained interns on how to use the software system and the database/file system
- Maintained client-specific data and log work in progress to increase management visibility.
- Oversaw client relationships through day-to-day interactions with key client personnel.
- Prepared projections, quarterly estimates and extensions for individuals and corporations.

Education

Fullstack Academy of Code, Manhattan, NY
Advanced Software Engineering Immersive   February 2018
Related Coursework: Functional Programming; Data Structures; Full-stack engineering

City College of New York, Manhattan, NY
Pre-work for computer science program   June 2017

Kingsborough Community College, Brooklyn, NY
Associate of Science, Computer Science   December 2016
Related Coursework: Calculus I, II & III; Linear Algebra; Discrete Structures; Differential Equations

Brooklyn College, Brooklyn, NY
Bachelor of Science, Accounting   December 2011
